Home: Setúbal (Portugal)

WORK EXPERIENCE

Overflow Interactive – Setúbal, Portugal

Game Developer (Intern)

[28/10/2025 – 06/02/2026]

- **System Architecture:** Engineered a **modular Magic and Loot system** in C#, utilizing decoupled architectures to ensure high scalability and easy customization of reward logic.
- **Core Mechanics:** Developed robust **Combat Systems** and complex **Animation State Machines** in Unity, focusing on fluid player feedback and state-driven logic.
- **UX & Audio:** Designed and implemented responsive **User Interfaces (UI)** and integrated **spatialized audio systems** to enhance environmental immersion.
- **Level Design:** Conceptualized and constructed immersive 3D environments with given assets, focusing on spatial layouts that balance aesthetic appeal with functional gameplay flow.

Arsenal do Alfeite S.A. – Almada, Portugal

AR/VR Developer (Intern)

[13/03/2023 – 11/08/2023]

- **Cross-Platform Development:** Engineered and maintained high-fidelity 3D applications for both **PC and iOS** using Unity, focusing on performance optimization for mobile hardware.
- **IoT & Connectivity:** Engineered a **navigation simulation** integrated with **Node-RED** to test and validate real-time data communication and message brokering between simulated environments and external controllers.
- **Augmented Reality (AR):** Designed and deployed a specialized **iOS AR application** for 3D model visualization, enabling interactive demonstrations of naval assets.
- **Stakeholder Engagement:** Acted as the technical lead for live demonstrations and system presentations to key partners and clients, including **The Portuguese Navy**, **Vodafone**, and **Oracle**.

Fraudio B.V. – Lisboa, Portugal

Data Engineer (Junior)

[01/09/2020 – 01/04/2022]

- **Big Data Development:** Engineered and managed large-scale analytics dashboards on the **Databricks** platform using **Scala**, focusing on real-time data visualization and fraud pattern analysis.
- **Systems Research:** Conducted in-depth benchmarking and performance evaluation of various **data storage technologies** to optimize query latency and system scalability.
- **Workflow Automation:** Designed and implemented automated reporting pipelines by integrating **Databricks with Slack APIs**, streamlining incident response and internal communication.
- **Agile Collaboration:** Worked within a high-performance DevOps environment, contributing to the reliability and efficiency of distributed data processing tasks.

ScorpionBonus, Lda – Almada, Portugal

Web Developer (Intern)

[03/2020 – 06/2020]

- **Full-Stack Development:** Developed and maintained multiple administrative web portals and landing pages for a diverse portfolio of corporate clients.
- **Database Integration:** Designed and implemented relational database schemas using **MySQL**, ensuring data integrity and optimized query performance.
- **Client-Centric Solutions:** Translated business requirements into functional web features, focusing on user experience and cross-browser compatibility.

EDUCATION AND TRAINING

BSc in Computer Science & Engineering

Polytechnic Institute of Setúbal (IPS) [10/2023 – Current]

City: Setúbal | **Country:** Portugal | **Website:** https://ips.pt | **Field(s) of study:** Information and Communication Technologies

Academic Mobility Program

Macao Polytechnic Institute [05/01/2025 – 30/05/2025]

City: Macau | **Country:** China | **Website:** https://www.mpu.edu.mo/en/index.php | **Field(s) of study:** Information and Communication Technologies

Higher Professional Technical Course (CTeSP) – Game Development & Multimedia

Polytechnic Institute of Setúbal (IPS) [10/2021 – 08/2023]

City: Setúbal | **Country:** Portugal | **Website:** https://ips.pt

Vocational Technical Course – IT Systems Management & Programming

Escola Secundária de Cacilhas-Tejo [2017 – 2020]

City: Almada | **Country:** Portugal

SKILLS

MySQL / Git / C# / Social Media / Google Drive / Github / Unity / Visual Studio Code / C / SQL / PHP / Java

LANGUAGE SKILLS

Mother tongue(s): Portuguese

Other language(s):

English

LISTENING C2 **READING** C2 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

HONOURS AND AWARDS

[2022] IADE – Creative University

2nd Place | Games For Good GameJam

- **Project:** "Little Help" – An arcade-style social awareness game focused on the challenges of homelessness.
- **Systems Engineering:** Engineered a **resource and time management system** where players must balance specific NPC requests with a limited budget and strict time constraints.
- **Game Loop Design:** Developed a strategic reward cycle based on scoring and funding from a centralized "Help Center," requiring complex decision-making logic and state management.

Link: https://lodyny.itch.io/little.help

[2022] Lisbon Games Week (Representing IPS)

Official Representative

- **Public Engagement:** Showcased original projects to large-scale audiences, conducting live **playtesting sessions** and gathering critical user feedback for iterative mechanic improvements.
- **Technical Training – Kwalee Workshop:** Participated in an advanced production workshop led by **Pedro Caria (CTO at Kwalee)**, focusing on game balancing optimization and UX-driven production pipelines.
- **Industry Networking:** Engaged with the national Game Dev ecosystem to exchange architectural insights and emerging tech trends.

[2023] 42 Lisboa

42 Piscine (C Programming)

- **Low-Level Engineering:** Completed the intensive 26-day immersion program, reimplementing standard C library functions (e.g., printf, memcpy, strlen) from scratch using only system calls.
- **Memory Management:** Mastered manual memory allocation/deallocation (malloc/free) and pointer manipulation, ensuring 100% leak-free code through rigorous automated testing.
- **Algorithmic Logic:** Solved complex logic puzzles and data structure challenges under strict time constraints, adhering to the "42 Norm" (high-standard coding style and methodology).

PROJECTS

[15/03/2026 – Current]

Home Server Infrastructure | Self-Hosted Environment

- **Linux Administration:** Configured and maintained a dedicated **Ubuntu Server** instance, utilizing **SSH (Secure Shell)** for encrypted remote management and secure CLI-based administration.
- **Containerization (In-Progress):** Architecting a deployment environment using **Docker** and **Docker Compose** to containerize personal software projects and microservices.
- **System Orchestration:** Implementing isolated environments to streamline the lifecycle of development, testing, and hosting for personal web and backend applications.
- **Proactive Learning:** Developing a hands-on understanding of network protocols, server-side security, and resource management within a Unix-based ecosystem.
